

A high-angle, front-facing view of a white Cirrus SF50 aircraft in flight. The aircraft is positioned centrally, with its wings spread wide. The background is a vast, green landscape with dense forests, fields, and some small buildings, all seen from a high altitude. The lighting is bright, suggesting a sunny day.

VISION SF50

**THE CIRRUS LIFE
AT JET SPEED.**

INTRODUCING THE NEW JET AGE.

*"With the Vision Jet SF50, you can fly farther, faster, higher,
carrying more people and cargo. That's what it's all about."*

Dale Klapmeier Co-Founder & Chief Executive Officer

THE PERSONAL JET. DEFINED.

The Vision SF50 is the realization of a vision to reimagine and reinvent the jet airplane in order to create a whole new category of aircraft —The Personal Jet. It's a jet that's designed to be flown by the owner. Not requiring a full-time professional pilot or a full-blown flight department, the Vision SF50 fills the untapped void between high performance pistons and the Very Light Jet.

Simpler to fly and easier to operate and own, the Vision SF50 is truly a revolution in personal transportation. It makes jet performance accessible to pilots and aircraft owners who, up until now, could only dream.

Of course, with the exclusive Cirrus Airframe Parachute System™ (CAPS™) the Vision SF50 also sets a new standard in jet aircraft safety.

CIRRUS
VISION SF50

SMART DESIGN

The Vision Jet is the perfect example of the passion for innovation that has driven Cirrus since the SR20 came off the drawing board.

BREAKTHROUGH JET INNOVATION

Continuing with Cirrus' tradition of groundbreaking carbon fiber technology, the result is an advanced seamless monocoque carbon fuselage that is lighter and stronger making it the state-of-the-art pressure vessel in its class.

The imaginative "piggyback" engine placement and eye-catching V-tail design is a novel solution to reducing cabin noise.

The Cirrus Airframe Parachute System™ (CAPS) provides the ultimate safety advantage—an exclusive Cirrus technology that has saved over 90 lives in SR20 and SR22 aircraft.

SOPHISTICATED SIMPLICITY

Less work. More joy. More safety. That's the premise of the Cirrus flying experience. The flight deck technologies pioneered by Cirrus are taken to an even higher level in the Vision Jet.

THE JET AGE. SIMPLIFIED.

The Cirrus Life is about using your personal aircraft to enhance your life, not consume it. And that is one of the revolutionary aspects of the Vision SF50. You don't have to be a full time pilot or have a flight department to take your flying lifestyle to jet speed. Everything about the Vision SF50 has been designed to make the aircraft a pleasure to own and fly.

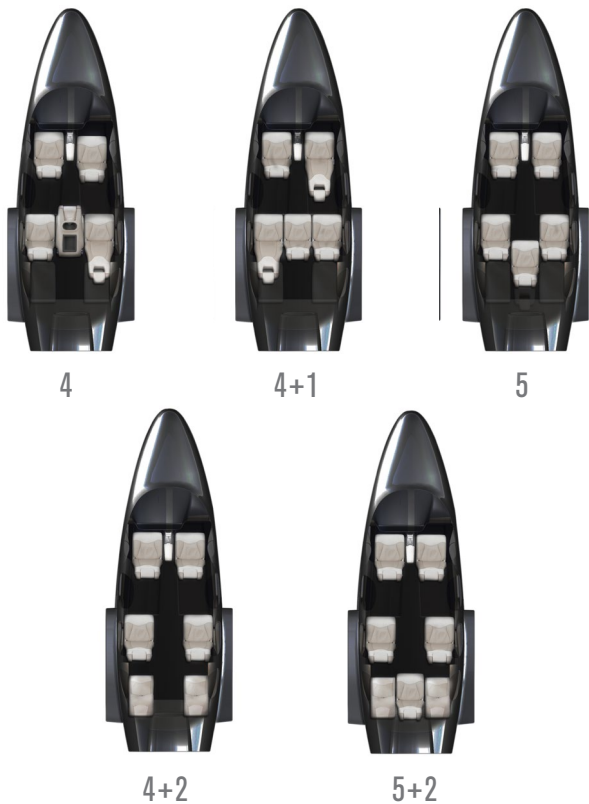

Features like side yoke controls, the Cirrus Perspective™ by Garmin® 3000 based avionics, Synthetic Vision Technology (SVT) and single lever FADEC engine control creates a flying experience that lets you safely and comfortably fly with the confidence and control that can only be found in a Cirrus.

COMFORT & FLEXIBILITY

With unsurpassed interior space and the luxurious interiors Cirrus is known for, passenger and pilot comfort is obvious at a glance.

DESIGNED WITH YOU IN MIND.

Modular seats accommodate a range of five passenger seating arrangements for maximum comfort and flexibility.

Pilot comfort is not forgotten. Easy access to the cockpit means you don't have to be a contortionist to get up front.

Automatic pressurization technologies and dual climate control zones assure comfort at any altitude and temperature.

Large, strategically placed windows give passengers panoramic views to enjoy.

PERFORMANCE & SPECIFICATIONS

The Vision SF50 Personal Jet is a breakthrough in personal aviation. It goes faster: 300 KTAS cruising speed. It goes farther: up to 1,200 nm. It carries more payload: up to five adults and two children. But the remarkable achievement is that you can have this level of jet performance in a true personal aircraft that doesn't require an entire flight operations department to fly and maintain it.

STANDARD FEATURES

Airframe

- Air Conditioning
- Certified Flight Into Known Ice
- Modular Seating for 5 Adults
- USB Convenience Power
- Reclining Seats
- Tinted Windows
- Single Tone Paint
- Leather Seating

Avionics

- Cirrus Perspective™ by Garmin® G3000 Based Avionics
- 3 Axis Perspective Digital Autopilot with Blue Level Button
- Electronic Stability and Protection (ESP)
- Dual WAAS GPS/Comm/Nav
- Dual AHRS/Dual ADC
- ADS-B Transponder
- Next Generation Traffic (TIS-B) and Weather (FIS-B)
- Synthetic Vision Technology

OPTIONAL EQUIPMENT

Airframe

- 6th & 7th Weight Limited Seats
- Dual Zone Climate Control
- Ski Tube
- Multi-Tone Paint
- Premium Interiors
- Xi Customization Options

Avionics

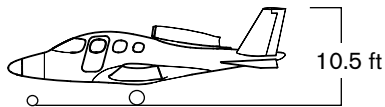

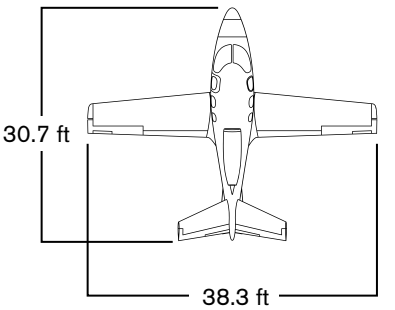

- Perspective Enhanced Traffic (TCAS-1)
- Perspective Global Connect
- Satellite Entertainment and Weather
- 3rd AHRS and ADC
- TAWS-B Terrain Warning
- Enhanced Vision System (EVS)
- Real Time Onboard Weather Radar
- ADF
- DME

PERFORMANCE & SPECIFICATIONS-CONT.

ENGINE

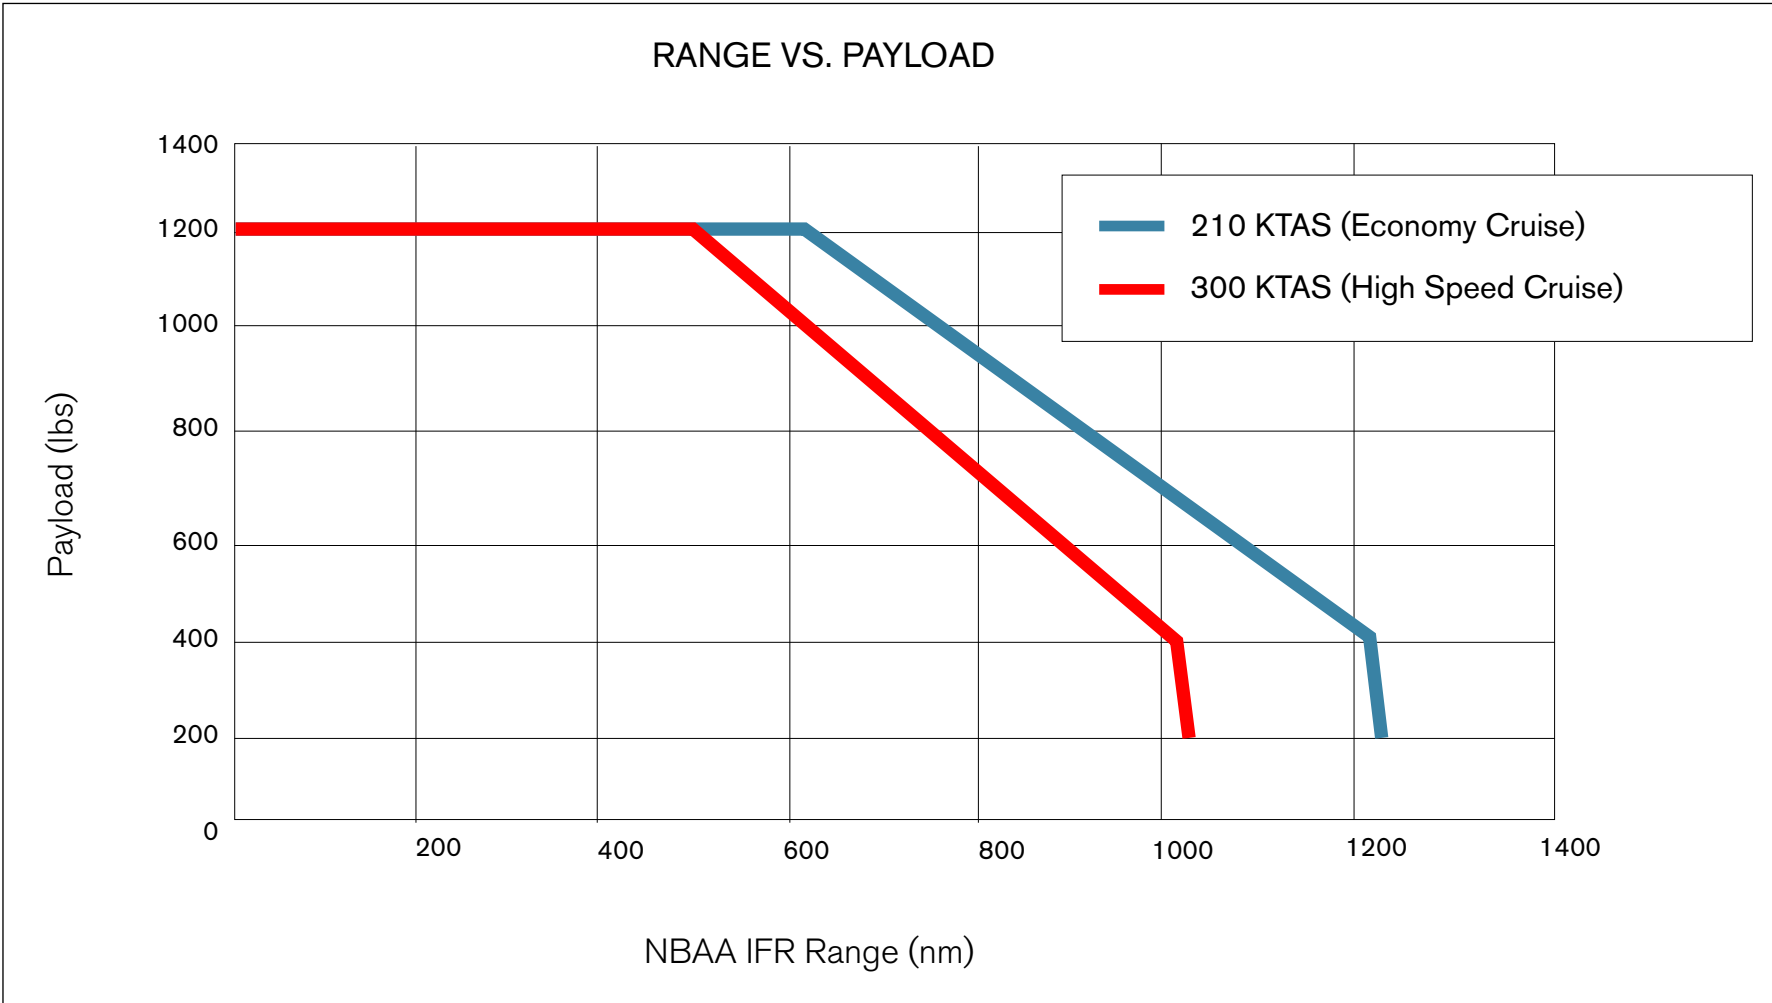

Manufacturer	Williams International
Model	FJ33
Thrust (Approx.)	1800 lbs

PERFORMANCE*	US UNITS	METRIC
Takeoff	1744 ft	532 m
Takeoff Over 50ft Obstacle	2298 ft	700 m
Max Operating Altitude	FL280	FL280
Stall Speed with Flaps	Mid 60's	Mid 60's
High Speed Cruise	300 KTAS	300 KTAS
Landing Ground roll	1245 ft	379 m

*Fits inside a 40 ft. Hangar

DIMENSIONS	US UNITS	METRIC
Wingspan	38.3 ft	11.7 m
Length	30.7 ft	9.42 m
Height	10.5 ft	3.2 m
Cabin Width	5.1 ft	1.56 m
Cabin Height	4.1 ft	1.24 m
